# Snake

With the same gameplay as the classic version of Snake, the new Snake offers updated graphics. To those unfamiliar to the game, the user controls the green snake and guides the snake to eat the delicious apples that are generated across the board. If the snake eats the apple, the snake grows in size. In order to control the snake, the user can swipe in one of four directions, up, down, left, or right to direct the snake toward the apple. Aim to obtain the highest score!
